(PDF) Cognition in practice: Mind, mathematics and culture ...

In this innovative study, Jean Lave moves the analysis of one particular form of cognitive activity--arithmetic problem-solving--out of the laboratory and into the domain of everyday life. In so doing, she shows how mathematics in the "real world", such as that entailed in grocery shopping or dieting, is, like all thinking, shaped by the dynamic encounter between the culturally-endowed mind and its total context, a subtle interaction that shapes both the human subject and the world within ...

Cognition in Practice (Lave)

Lave, in Cognition in Practice, makes the effort to address such dualities as theory/practice and mind/body, revaluing the latter concepts with respect to learning (cognition/learning is another such duality). Yes, two decades later, this is no longer groundbreaking.

Situated Learning (J. Lave) - InstructionalDesign.org

"Cognition" observed in everyday practice is distributed - stretched over, not divided among — mind, body, activity and culturally organized settings (which include other actors). Empirical support for this proposal has emerged recently from research exploring the practice of mathematics in a variety of common settings.
