Phonological Patterns/Processes

Language can be divided into several different areas such as semantics, syntax, pragmatics and phonology. Today's post will focus on phonology which is the language system regarding the rules of sound combinations in a language. More specifically, I will discuss phonological patterns/processes that are used by children to simplify adult speech.

Top 5 Phonological Patterns in Children treated by SLPs ...

patterns for the first cycle of intervention include: (a) final consonants, (b) /s/ clusters, (c) velars, and (d) liquids. Potential optimal phoneme targets to enhance the phonological patterns were projected for cycle one (approximately 16 contact hours). In addition, potential secondary target patterns for later cycles were discussed.

Few acoustic studies of the intervocalic consonant lenition in central Italian dialects (a process known as Gorgia Toscana) have been undertaken. This study examines speech data from Florentine Italian in order to describe the process of Gorgia Toscana quantitatively and to assess the roles of physiological, perceptual, phonological, and social factors in the process.

Consonant Strength eBook por Lisa M. Lavoie ...

The /s/ and /r/ consonants are a particular relative strength among AAE learners (vs. GAE learners), even those with SSD. Recall also that /s/ and /z/ were acquired earlier by TD AAE learners even in final position, as was the cluster /-rs/, despite the nonfavored status of final position in that dialect.
