Combining case studies and theoretical discussions, Current Paleoethnobotany presents the first full discussion of the major stages and problems of paleoethnobotanical research, from designing and testing equipment, such as flotation machines, to quantification and interpretation.

Combining case studies and theoretical discussions, Current Paleoethnobotany presents the first full discussion of the major stages and problems of paleoethnobotanical research, from designing and testing equipment, such as flotation machines, to quantification and interpretation. The volume explores a wide range of issues concerning collection techniques, analytical procedures, and interpretive models that will provide accurate information about past human societies from plant remains.

**Current Paleoethnobotany:
Analytical Methods and Cultural ...**

Paleoethnobotany is the study of behavioral and ecological interactions between past peoples and plants, documented through the analysis of pollen grains, charred seeds and wood, phytoliths, and residues (Ford 1979; Hastorf & Popper 1988; Warnock 1998;
