Positive space is the filled space, the object (s) or element (s) in the design. Negative space is the empty space, or the open space between design elements or objects, such as a background. Positive and negative space, white or black. Areas of a design that contain "nothing" (negative space) are important visual elements that provide balance.

Elements of Design

The late Charles D. Brown, respected throughout the aerospace world, had a distinguished career as manager of planetary spacecraft projects and as a college lecturer in spacecraft projects and spacecraft design. During his 30 years with Lockheed Martin, he led the design team that produced propulsion systems for Mariner 9 and Viking Orbiter.

This is the second edition in a series about the elements of design. We are going to talk about space and how it effects and works in decorating. Space is something we think about without really thinking about it. It is part of our unconscious make up. But as a decorator being aware of the space we live and work and decorate in is VERY important.
