You can create animations with HTML5 by combining HTML, CSS, and JavaScript (JS), with which you can build shapes. Also, you can control animations and edit images, video, and audio by means of JS or CSS elements, all of which you then add to a drawing board, which you set up with the `<canvas>` element.

Create Beautiful HTML5 Animations With the Canvas Element

Motion UI includes a tiny JavaScript utility that will work anywhere as long as jQuery is loaded. However, Foundation 6 includes a customized version of this code that is included in `js/foundation.util.motion.js`. If you are using the Foundation version of this utility, and you wish to animate your own elements, trigger it this way:

HTML5 is a markup language used for structuring and presenting content on the World Wide Web. It is the fifth and latest major version of HTML that is a World Wide Web Consortium (W3C) recommendation. The current specification is known as the HTML Living Standard and is maintained by a consortium of the major browser vendors (Apple, Google, Mozilla, and Microsoft), the Web Hypertext Application ...
