Mirror ...

The first-generation surveillance system consists of the use of analog CCTV cameras, multiplexers, analog monitors and VCRs. Camera images are transmitted via coaxial cables and stored in VCR cassettes. Due to limited storage capacity, the cassettes must be replaced frequently for a long period of recording.

Welcome to Planet VIVOTEK

A Camera Monitor System (CMS) consists of a camera, an image processing pipeline, and a monitor for viewing the camera image. Examples include automotive side and rear view mirror replacement systems and medical endoscopes (where the doctor views the endoscope image on the monitor).

Monitor - Security Camera Systems - Video Surveillance

...

A CCTV video camera creates synchronization pulses to lock the viewing monitor on the picture. These pulses occur at a rate of 15,750 times a second. There is one synchronization pulse or (sync pulse) for each line in the picture frame. The sync pulse tells the video monitor to start drawing a video line across the picture screen.
