### How to Read Buildings A Crash Course in Architectural ...

Likewise, larger homes tend to have more walls — because larger homes generally have more rooms, rather than simply larger rooms. You'll probably never see the volume of a house plan listed on a house plan website, but the number representing the area of a floor plan often depends on how the volume is counted.

### Read and Understand Measurements in House Plans

Step 1 Locate the scale -- either at the top of the blueprint page, usually next to the title, or at the bottom of the page -- to identify what each unit on the paper translates into in actual building feet. A 1/4-inch scale is common, meaning every 1/4-inch on the blueprint is equal to 1 foot in actual building length. Step 2
