### Kadett - Engine Swap Depot

German race car driver and builder Hover Hovemann built his Opel Kadett C to race in European hill climb events. He installed the body over a C4 Corvette ZR-1 chassis and powertrain pulled from a wrecked Corvette. The ZR-1 came from GM with a 5.7 L LT-5 V8 engine designed by Lotus and built by Mercury Marine.

### Opel Kadett on a Corvette ZR-1 Chassis - Engine Swap Depot

Klaus ultimately settled on a different engine, namely a turbocharged 2.0L B204L from a Saab 900 donor car he purchased. Klaus had previously heard about a Kadett swap with this engine in the UK, which was supposedly done without heavy modifications. It sounded perfect as he needed the completed car to pass the Finnish MOT test.
