Result Analysis In Project System

Results analysis is used to: a. Calculate the inventory value of finished and unfinished products in a non-valuated project stock or non-valuated sales stock environment or b. You are using a valuated sales order stock or valuated project stock and want to capitalize goods that have been delivered but not yet invoiced.

Results Analysis (RA) | Project Systems

In any customer projects with more lead time (at least 3 months), RA plays an important role. Results Analysis is to valuate ongoing unfinished activities, in projects during period-end. If you look at profit and loss of such ongoing unfinished activities, you will see costs only and therefore your P&L shows loss.
