Black Caiman - Crocodile Facts and Information

The black caiman is a species of large crocodilian and, along with the American alligator, is one of the biggest extant members of the family Alligatoridae and order Crocodylia. It is a carnivorous reptile that lives along slow-moving rivers, lakes, seasonally flooded savannahs of the Amazon basin, and in other freshwater habitats of South America. It is a large species, growing to at least 5 m and possibly up to 6 m in length, which makes it the fourth-largest reptile in the Neotropical realm, b

Black caiman - Wikipedia

N.B. Exceptionally large specimens can be found in all species of crocodilian. The black caiman is the largest member of the alligator family, and the largest predator in the Amazon River basin, with adult males averaging 4–5 metres (13.1–16.4 feet) in length. The species gets its name from its dark, black skin colouration, which provides camouflage during nocturnal hunts, and is thought to help absorb more heat.

Black Caiman | Crocodiles Of The World

Fame Rating (s) The Black Caiman, *Melanosuchus niger* is a species of caiman located in South America. It is the largest of the caiman species, reaching five metres in length and rivaling crocodiles and alligators in size.

Black Caiman - The Zoo Tycoon Wiki - Zoo Tycoon, Zoo ...

Black caimans (*melanosuchus niger*) look similar to alligators and crocodiles. The family tree is quite intertwined, but according to recent research, the caiman is more similar to alligators than crocodiles.

9 Black Caiman Facts: Giant of Ecuador's Amazon ...

The black caiman is structurally dissimilar to other caiman species, particularly in the shape of the skull. Compared to other caimans, it has distinctly larger eyes. Although the snout is relatively narrow, the skull (given the species' considerably larger size) is much larger overall than other caimans.

Black caiman — Wikipedia Republished // WIKI 2

A swimming black caiman. The black caiman is one of the largest extant reptiles. It is the largest predator in the Amazon basin and possibly the largest member of the family Alligatoridae. Most adult black caimans are 2.8 to 4.26 metres (9.2–14 ft) in length, with a few old males growing larger than 5 m (16 ft) and exceeding a weight of 400 kg (880 lb).
