SAS Access Control. Posted 06-16-2015 (2678 views) our users do NOT want all SAS accounts to access all applications, programs, and data. but all accounts by default are part of SASUSERS group and if we deny access to ReadMeta or Read, a lot of the programs won't function properly anymore (especially if we deny libraries and tables). any suggestions on a smart way to control who can access what data and what program? it's almost impossible to set authorization to all the libraries and tables ...

**SAS Access Control - SAS Support Communities**  
SQL\_FUNCTIONS=ALL allows for SAS functions that have slightly different behavior from corresponding database functions that are passed down to the database.Only when SQL\_FUNCTIONS=ALL can the SAS/ACCESS engine also pass these SAS SQL functions to Oracle. Due to incompatibility in date and time functions between Oracle and SAS, Oracle might not process them correctly.

**SAS Help Center: Passing SAS Functions to Oracle**  
SAS Enterprise Guide is a powerful Windows.NET client application with an easy-to-use graphical user interface designed to enable self-sufficient and guided access to the analytical power of SAS software. Business analysts, programmers and statisticians can leverage the power of SAS across a diversity of platforms.
